

ERFAN MOGHADDAM

Android Developer | Kotlin | Jetpack Compose

Iran | Available for remote freelance and contract projects

erfanmusicmoghaddam@gmail.com | +98 930 066 1383 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Product-oriented Android Developer focused on Kotlin, Jetpack Compose, Clean Architecture, and reliable REST API integration. Experienced in building and improving real mobile products involving authentication, session management, camera-assisted workflows, payments, wallet flows, biometric security, localization, and predictable application state.

PROFESSIONAL EXPERIENCE

Android Developer - Private Smart-Mobility Products

Private product team | Operational and consumer Android applications

- Developed and improved Android features with Kotlin and Jetpack Compose for real operational and consumer workflows.
- Integrated REST APIs for image and data exchange, server-side processing results, authentication, session management, token refresh, and request-retry behavior.
- Implemented camera-assisted identification flows, payment and wallet experiences, biometric authentication, localization, and structured error states.
- Collaborated with the development team on bug fixing, performance improvements, stability, and preparation for daily product use.

SELECTED PRODUCT EXPERIENCE

Operational Android Platform

- Camera-assisted vehicle identification and secure image transfer.
- Server-backed processing, payment operations, and status handling.
- Fast operator UI built for frequent real-world use.

Consumer Smart-Parking App

- Wallet and balance-based payment experience.
- Biometric authentication for selected sensitive actions.
- Localized reusable Compose components and predictable UI state.

Private project names and proprietary screens are intentionally omitted to respect confidentiality.

PUBLIC PROJECTS

Crypto Signal API - Python-based API for cryptocurrency market-analysis and signal-generation experiments with modular data-processing flows. [Repository](#)

Developer Portfolio - Responsive bilingual website presenting technical experience, anonymized case studies, services, and direct contact options. [Live Site](#)

TECHNICAL SKILLS

Android: Kotlin, Jetpack Compose, Material Design, Android Studio, Localization

Architecture: MVVM, Clean Architecture, Repository Pattern, reusable UI components

Integration: REST APIs, Ktor, Retrofit, Hilt / Koin, authentication, token refresh, sessions

Additional: Git, Python, debugging, performance improvement, biometric UX, wallet flows

EDUCATION

B.Sc. in Biomedical Engineering - Engineering, problem-solving, and software development perspective applied to practical products.
